

Engine, tools, equipment repair and maintenance SIG:

This SIG tests and maintains equipment in running condition including John Deer Tractor, Gator, riding and walk behind mowers, garden tillers, string trimmers, blowers and service records on each. This includes both gasoline powered and battery.

We also repair and service the several wagons and wheelbarrows.

We maintain the tools and supplies needed to do these repairs and maintenance as well as training members on use. Our group is small and basically on call as needed and new members are always needed.
