- End of support by 2025
- Amazon App store
- Still unavailable in India

Microsoft Windows Subsystem for Android

- Surface Pro 10
- Surface Laptop 6
- March
- Intel Core Ultra
   April
- Qualcomm Snapdragon X Elite-based ARM
   June
- Ultra-wide front camera
- Neural processing unit
- NFC reader
- AI – run locally
  real-time live captions & translations
  AI upscaling & frame rate smoothing

Microsoft AI PCs

- AI explorer

  Advanced Copilot

  built-in history/timeframe feature
  everything searchable using natural language
  across any app
  search: previous opened conversations
                documents
                web documents
                images

Microsoft AI PCs

- Voice Access now supports more languages, custom commands, and additional actions.
- Narrator now lets you preview natural voices, use a new keyboard shortcut for image descriptions, and more.
- Windows now lets you share content with more apps.
- Windows can suggest screen casting when multitasking and helpful links if you have problems with connecting.
- Snap Layouts can predict what apps you want to arrange and in what layout.
- New features for Windows 365, such as a dedicated mode, passwordless authentication, fast account switching, and more.

Windows 11 Moment 5

- Windows 10 & 11Features

- The winget repair command is now available and can be used to repair a package that is having issues.
- Winget can enable Windows Features as a package dependency.
- Winget now supports rebooting your machine if the installer return code indicates that a reboot is required. You can do this by passing the --allow-reboot flag.
- WinGet configuration can accept a URL rather than only a local file.
- Performance improvements to be more network efficient with the CDN along with better flows to handle scenarios with elevation requirements.
- Support for Entra Id authentication (formerly Azure Active Directory) for private REST sources. Note: The REST source reference implementation still needs to be updated.

Windows Package Manager 1.7

- Copilot new commands & plugins

Generative erase and silence removal

- Clipchamp silence removal
- Many more voice access features
- Improved inking, widgets, snap layouts

Windows 11 Moment 5

- Video highlights in Edge
  transcripts of YouTube or Vimeo – timestamps
    proceed to that timestamp
  ask questions "key moments?"
- Edge screenshot integration
  "what plant is that?"
- Mouse hover over Copilot icon
- Copilot key on keyboard
- Copilot layer on top of WVideoindows

Copilot getting pushy?

- Microsoft Store updates   Copilot
- PowerToys updates
  Keyboard Manager
   shortcuts to start applications
    Color Picker new look
    Peek to preview drives

PowerToys Readme

Updates

- ## OneDrive April?

"extract answers from documents, presentations, spreadsheets, and other files"

- ## Copilot

Examples:

What were the total beverage sales last week? Put responses in a table view by day.

Compare the main differences between the selected files and put the differences in a table view.

CoPilot will be able to create new content based on these files too. According to Microsoft's own guidance, this is done through:

Using the /sales-enablement.docx as reference, create an outline of a sales pitch to a new customer.

For these selected resumes, create a table with names, current title, years of experience, educational qualifications, and current location.

Create a list of frequently asked questions about project Moonshot.

Look at /proposal1.docx and /proposal2.docx and create a table outlining the differences in cost, milestones, and date of delivery.

Improving content that is structured in a document, spreadsheet, or presentation will be the new thing too, with prompts like 'what suggestions do you have to improve the deck?'

Copilot AI features futures

- None of us are as experienced as all of us
- Awareness, Preparedness, Understanding
