Copilot Chat Window (Main Area):

Copilot 11:17 AM

Hi Kat,

Thanks for trying this private preview. As your Copilot, I'm here to help you with cutting-edge AI technology that synthesizes info from across docs and messages to give you summaries, help you answer business questions, and quickly draft content. I'm here to help but do make mistakes—so please check content for accuracy and share your feedback.

Ready to explore? Select one of the suggestions below to get started...

Summarize	Create	Ask
Summarize key points from (file)	Draft next steps from (meeting)	What are the goals for...
Catch up on unread chats	Create SWOT based on (file)	What happened in (meeting)?
Summarize emails from (person)	Draft a congrats note about...	Who is (person)?

You can always use the prompt guide for suggestions by selecting this button

Other Tips

• Widget

The screenshot shows the Windows 'Widgets settings' window. At the top right, it displays the user's email 'jenkinsonjp@yahoo.com' and a 'Sign out' link. Below this, the 'Widget taskbar behaviors' section contains three toggle switches, all of which are turned 'On': 'Open Widgets board on hover', 'Show notification badges', and 'Show announcements'. The 'Personalized feed' section is partially visible at the bottom, with a large red arrow pointing to the 'Manage interests' link. At the bottom right, there are links for 'Give feedback', 'Privacy dashboard', 'Privacy statement', and 'Terms of use', along with the version number 'Version 423.8900.0.0'.

- LAPS

Lacking in detail

Previously available in Microsoft Download Center

Windows 11 Pro, EDU, and Enterprise

Windows 10 Pro, EDU, and Enterprise

Windows Server 2022

Windows Server Core 2022

Windows Server 2019

Local Administrator Password Solution

- LAPS supports Azure Active Directory (in private preview currently, public preview coming soon)
- Retrieves stored passwords via Microsoft Graph.
- Creates two new Microsoft Graph permissions for retrieving only the password "metadata" (i.e., for security monitoring apps) or the sensitive cleartext password itself.
- Provides Azure role-based access control (Azure RBAC) policies for authoring authorization policies for password retrieval.
- Includes Azure management portal support for retrieving and rotating passwords.
- Helps you manage the feature via Intune!
- Automatically rotates the password after the account is used.
- New capabilities for on-premises Active Directory scenarios
- Password encryption: Greatly improves security for these sensitive secrets!
- Password history: Gives you the ability to log back into restored backup images.
- Directory Services Restore Mode (DSRM) password backups: Helps keep your domain controllers secure by rotating these critical recovery passwords on a regular basis!
- Emulation mode: Useful if you want to continue using the older LAPS policy settings and tools while preparing to migrate to the new features!
- Automatic rotation: Automatically rotate the password after the account is used.
- New features for both Azure AD and on-premises AD scenarios
- Rich policy management is now available via both Group Policy and Configuration Service Provider (CSP)
- Rotating the Windows LAPS account password on demand from Intune portal is very useful when, for example, handling a possible breach issue.
- Dedicated event log is located under Applications and Services. See Logs > Microsoft > Windows > LAPS > Operational for improved diagnostics.
- New PowerShell module includes improved management capabilities. For example, you can now rotate the password on demand using the new Reset-LapsPassword cmdlet!
- Hybrid-joined devices are fully supported.

LAPS features

- USB issue
- Needs WSL V2 & Windows Updates
- `uname -a`
Linux kernel 5.10.60.1 or higher

Windows Subsystem for Linux

- AI can (and does) mimic “the familiar voice”
 - No “Hello” for answering phone
 - No “Yes”
 - No voice answer
 - No answer at all
- Limit who can see social media posts
 - who can see photos, videos, ...
 - Facebook, LinkedIn, Twitter, Instagram
- Turn off preview
- Turn off display images in email

Consider

- Future?
- Detects present, absent, not interacting
- Locked automatically when unattended
- Privacy concerns

Windows Presence Sensing

Privacy & security > Presence sensing

The settings on this page do not prevent you from utilizing wake and lock features with presence sensing. Some desktop apps might not appear on this page or be affected by these settings. [Learn more about presence sensing](#)

Diagnostic data

Helps to improve Windows and keep it secure, up to date, and working as expected

Sending required data ^

You're sending required diagnostic data

As a part of using Windows, your device sends Microsoft a limited set of data that is necessary to keep your device and operating system secure, up to date, and working as expected.

Send optional diagnostic data

Help Microsoft improve your Windows experience and fix problems more quickly by sending us additional diagnostic data. This includes data about websites you browse, how you use apps and features, and enhanced error reporting.

Off

Your device will be equally secure and will operate normally even if you choose not to send optional diagnostic data.

Improve inking and typing

Send optional inking and typing diagnostic data to Microsoft

Off v

Tailored experiences

Let Microsoft use your diagnostic data for personalized tips, ads, and recommendations

Off v

View diagnostic data

View your data in the Diagnostic Data Viewer
