

## FOR JANUARY 2017 MAC USERS GROUP WEBSITE ADDRESSES

What can you do with a website & its address (URL)?

**URL...**(Uniform Resource Locator) = web address

Save it...

- File > Save As, then choose destination, then choose format e.g. Web Archive or Page Source, then Save
- Webloc - drag/drop URL onto Desktop

copy/paste it

Bookmark it -

- Add to Bookmark Menu - drag/drop to Sidebar
- Add to Favorites Bar - drag/drop to Favorites Bar
- Window > Pin Tab - “pin” it

Add to Reading List - Bookmarks > Add to Reading List or  
click + in left part of address line

File > Share >

- Email
- Messages
- Airdrop
- Notes
- Reminders

Drag/drop URL to another browser in Dock

Connect it to a text word in mail or word processor - use  
Edit > Add Link in application

**PAGE...**(SAFARI)

View > Customize Toolbar

Command + or View > Zoom In -- makes text bigger  
Command - or View > Zoom Out -- makes text smaller  
View > Show Reader - revert to reader mode  
Do an RSS of a favorite website  
Create a “stickies” of a text selection (command/shift/Y)  
Drag/drop selection on TextEdit in Dock  
Edit > Speech > Start Speaking - have selection read to us  
Edit > Copy - copy/paste selection  
Add image to photos (right click image)  
Use image as desktop pic - right click menu  
Window > Minimize page - OR use yellow button or double  
click title bar  
File > New Window - opens second window  
Work with tabs - choices in Safari > Preference > Tabs  
Edit > Find > Find - search within a website  
File > New Private Window - use “private” window (leaves  
no history)  
File > Export as PDF - exports page as pdf image file
