## Passphrases

- Hash
- Salt
- Hash – one-way cryptographic function

Any length input

Fixed length output

identical input => identical hash

slight perturbation in input => drastic change in hash

Rainbow tables

Salt + hash => more secure

**STRONG** passphrase + maximum encryption  
for naught if password given away or keylogger

## Genesis Wiki

**Genesis Store** - professional place that helps you to increase anonymity in World Wide Web.

Genesis Store specializing in selling:

- FingerPrints (FP),
- Cookies,
- Inject Scripts Info,
- Form Grabbers (Logs),
- Saved Logins,
- Other personal data obtained from different devices in the WEB.

Each bot in the store may include all mentioned above info of partial.

To help you work with this information we have developed professional software:

**Genesis Security** - the proprietary plugin which can simplify your work with FingerPrints and Cookies of the bots (holders).

You may purchase all the necessary data on any bot (holder).

NB: we do not check the sources or the accounts, we provide the info «as it is».

Fingerprints may be obtained in 2 different ways:

- real FP scratched by bot from the user's Device,
- generated FP based on the data grabbed by bot on the user's Device.

To find usefull information how to use this service, you can look at following sections:
