Infinite HD
The Outside World
Welcome to Infinite Macintosh!
A project to have an easily browsable collection of classic Macintosh software from the comfort of a (modern) web brwoser.
Browse around the Infinite HD to see what using a Mac in the mid 1990s was like.
Tips
• To add additional files (e.g. downloads from archives like Macintosh Repository and Macintosh Garden), simply drag them onto the srceen. They will appear in the "Downloads" folder in theThe Outside World.
• Conversely, to get folders or files out the Mac, you can put them in the "Uploads" folder. A .zip archive with them will be generated and downloaded by your browser.
• Files in the "Saved" folder will be saved across emulator runs (best-effort)
• To go full screen, you can click on the monitor's Apple logo. Or if you're on an iOS device, you can add this site to your home screen via the share icon.
