- Networking, IT, and media conversion experts
- Message board watcher
- ... and many more

# Strategic Focus for 2023

Why?

Changing **demographics** in Sun City

What?

Continual challenge to provide **value** to our members

How?

Focus on our **volunteers**

# Changing Demographics

Why?

- Newer Sun City residents are more computer-savvy, resulting in changing demand for SIGs and classes
- COVID-19 temporarily (?) changed people's attitudes
- Social Computing = changing intersection of social behavior and computational systems
  - **Monday 20 February** = Enquiring Minds event about Social Computing led by Rob Fisher, our new SIG Director

# Continual Challenge to Provide Value

- Competition for attention from social media
- Social interaction impeded by the pandemic and increased tech devices use at home
- Difficult capturing of expectations

What?

# Volunteers

- More volunteers = more activities = more value
  - New SIGs; new classes; more events through trial and error
- Members and volunteers benefit from social interaction and opportunities to learn
- Volunteers are critical to make it happen!
  - Tuesday 17 January = volunteer appreciation luncheon

How?

## Questions? Comments?
